FREEFALL ARRESTOR & CROSSHEAD REVAMP

Proven Freefall Arrestor retrofit is available from Ruhrpumpen™

Freefall Arrestor & Crosshead Revamp

Proven Freefall Arrestor retrofit is available from Ruhrpumpen

Ruhrpumpen has developed Freefall Arrestor retrofit designs which can most times be installed without interruption to your decoking operations.

Our designs allow for the use of your existing shoe type crosshead with modifications to accommodate our freefall arrestor and arrestor actuation linkage.

Alternately we can provide new wheeled crossheads with our freefall arrestor. This design allows for a more stable drilling platform and is easily modified to accommodate either existing rotary joint or Ruhrpumpen drill stem drive.

FEATURES

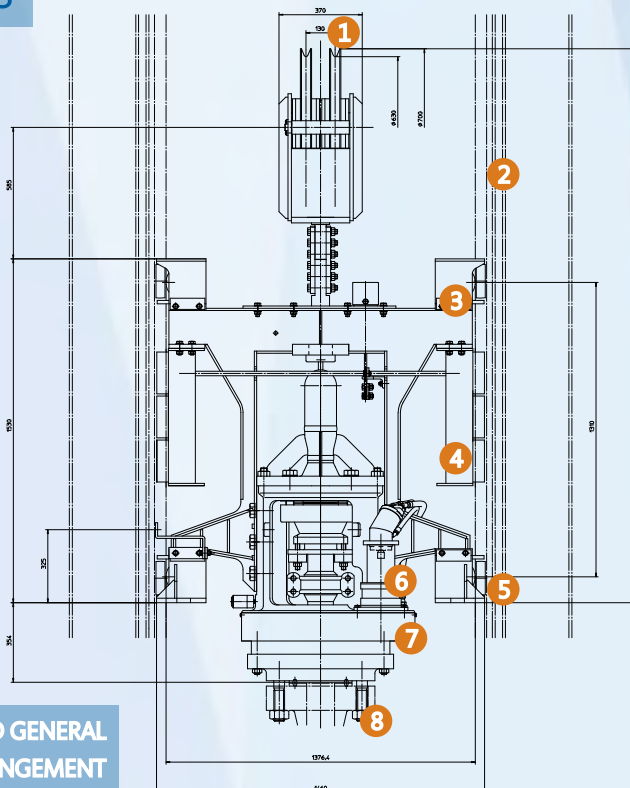

- Operational testing easily performed on a routine basis
- Arrestor cables and cable guides eliminated
- Cable grippers are eliminated
- TÜV (UL/FM equivalent) approved, over 5,000 installations)

ADDITIONAL SERVICES

In addition to being able to provide freefall arrestor revamps, our Houston, Texas and Edmonton, Canada Service Centers can provide parts and perform repairs for all of your system components such as combination cutting tools, rotary joints, decoking valves and isolation valves.

Characteristics

- 1 Travelling Pulley
- 2 Guide Rails / Main Beams
- 3 Roller Unit
- 4 Freefall Arrestor
- 5 Roller Unit with Latch Foot
- 6 Motor (hydraulic)
- 7 Drill Stem Drive
